Women

Project Overview

AI-powered FAQ system

Provides quick answers to frequently asked questions

Users can send questions through an API

Answers are returned in structured format

Objective

Develop an AI-based FAQ API

Store and manage FAQ data

Process user questions

Provide relevant answers quickly

Technologies Used

Node.js

Express.js

MongoDB

JavaScript

REST API

Postman

Visual Studio Code

Project Workflow

User enters a question

Request is sent to the API

API processes the question

FAQ data is searched

Relevant answer is returned

Response is displayed to the user mn

Features

Add FAQs

View FAQs

Search FAQs

Update FAQs

Delete FAQs

Get answers through API

API Endpoints

POST – Add FAQ

GET – View FAQs

GET /search – Search FAQ

PUT – Update FAQ

DELETE – Delete FAQ

Database
MongoDB
Stores:
Question
Answer
Category
Created date
Updated date

Output Demonstration

User Question:

“What is the college timing?”

API Response:

Returns the corresponding FAQ answer in JSON format

Benefits

Saves time

Provides instant responses

Easy FAQ management

Reduces repeated queries

Can be integrated with websites/apps

Future Enhancements

Advanced AI/NLP integration

Voice-based questions

Multilingual support

Admin dashboard

Analytics and reports

Conclusion

AI FAQ API provides a simple and efficient way to manage frequently asked questions and deliver quick answers using an API-based system.
